I'm a professional and passionate Front-End Developer focused on efficiency and constant learning. Courteous and enthusiastic, I am interested in Web Applications and everything in their orbit. I am fascinated by web programming and building websites. I am gaining knowledge and ideas working in this area. I am keen to gain more experience in the field. My goal is to build applications that are scalable and efficient under the hood while providing engaging, pixel-perfect user experiences.

🧠 Skills

Frontend
JavaScript, ReactJS, ES6, Firebase,HTML5,CSS3Bootstrap5 ,React Hooks, Responsive Design, Tailwind

Backend
NodeJS, ExpressJS, MongoDB,MySQL

Tools
Git, VSCode, Chrome Dev Tool, NPM, Yarn, Figma, Photoshop

🎓 Education

Bsc in Software Engineering, *Daffodil International University* ↗   01/2019 – present
Dhaka, Bangladesh

CGPA: 3.31 2 semester left

📁 Projects

24hr Health Care Center ↗
An authenticated user can get an appointment of his desired doctor.
Ask for an appointment of the doctor quickly with almost a single click. We take care of the rest.Visit the doctor, take the service based on your appointment. Get back to good health and happiness

Add to cart calculation ↗
In order to calculate your add-to-cart rate, first determine a given product. Then divide the number of products where a user added a product to their cart by the total price of the product. Multiply that product by 200$ to charge a tax, and add to your cart total.

Cryptocurrency Tracker, *Cryptocurrency Tracker with use React JS, Material UI and Chart JS, Coin Gecko API*
The Cryptocurrency Tracker website work by connecting with third-party aggregator APIs that enable them to tie into different crypto data feeds to display the info you need to track your assets. The thing is, most aggregators only work in certain countries and only have the technology to work with certain crypto feeds.
